
GENERAL HYDROPONICS
CALiMAGic® 1-0-0
CALiMAGic® 1-0-0 is a concentrated blend of readily available calcium and magnesium. It is formulated to assist fast growing plants by preventing secondary nutrient deficiencies. CALiMAGic helps optimize plant nutrition and enhances plant growth and development while preventing blossom end rot and tip burn in many crops such as tomatoes and lettuce as well as other calcium intensive plants.
Use CALiMAGic® as a part of your regular feeding program. It is a clean, fully soluble product that will not clog spray lines or drip emitters and can be used in reservoirs combined with many other fertilizers.
Directions:
Use 1 ml per liter (1 teaspoon per gallon) for most applications.
When using reverse osmosis or purified water, add 1 ml per liter (1 teaspoon per gallon) to water before adding nutrient solution.
When growing in coconut coir or using prepared soil or soilless mixes, add 1 ml per liter (1 teaspoon per gallon) to nutrient solution for the first two weeks. The same amount can be used to wet the media before first use.
