COCOTEK PREMIUM COCO NUTRIENT is a high quality base nutrient, specifically formulated so that you may utilize the unique properties of coconut coir. Coco coir's high levels of aeration, strong drainage properties, and disease resistance make it an ideal media for any grower. While all of our high quality nutrients can be used in coco coir, CocoTek Premium Nutrients are specifically designed to support and enhance your coco coir growing experience. Use CocoTek Premium Nutrients with CocoTek Premium Coco Coir for

**Mixing Directions:** Measure fresh water, preferably RO filtered. Measure CocoTek Grow A, add to water and stir, then measure Cocotek Grow B, add to water and stir. Maintain a pH in the range of 5.8 to 6.8. A conductivity meter is recommended to measure and maintain nutrient strength. The nutrient solution should range between 450 and 1,250 ppm (0.9 to 2.5 mS/cm EC).

optimum results.

SHAKE WELL BEFORE MIXING. Always add CocoTek Grow A to fresh water first and stir well, then add CocoTek Grow B. Never combine CocoTek Grow A with CocoTek Grow B in undiluted form; doing so may cause nutrient lockout making some minerals unavailable.

For optimal results, always use equal amounts of both A & B as shown in the chart below:

	GROW A	Grow B
Mild Grow Strength	5ml	5ml
Standard Grow Strength	10ml	10ml
Strong Grow Strength	15ml	15ml

All amounts in ml per Gallon.
