

FloraNova® Bloom

Promotes Vigorous Flowering
& Fruit Development.

- Superb for Hydroponic & Substrate Cultivation
 - Super Concentrated & pH stabilized
 - Outstanding for all kinds of plants
 - Use for flowering and fruiting phase

GENERAL HYDROPONICS®

FloraNova®

One-Part Nutrient

4 - 8 - 7
GUARANTEED ANALYSIS

FloraNova represents a breakthrough in fertilizer technology. Combining the strength of a dry concentrate & consistency of a liquid.

All elements required for hydroponic cultivation are combined together in this unique one part formulation.

FloraNova is extremely concentrated. A very small amount of FloraNova mixed with fresh water will provide your plants with proper nutrition. For hydroponics, soilless mixtures, potted plants or for your garden grown plants.

Use for all types of plants from early flowering through harvest.

Quantity		Application
625 ml / L	1/2 tsp / gal	Seedlings, Orchids & African Violets
1.25 ml / L	1 tsp / gal	Most plants during early growth
2.5 ml / L	2 tsp / gal	Most plants during later growth
3.75 ml / L	3 tsp / gal	Max strength for rapidly growing plants

All measurements are approximate in pure water

These values are intended to be used without supplements. When using supplements, please refer to genhydro.com for complete Feed Programs.

For Best Results:

- Use a conductivity or ppm meter to monitor water quality and control nutrient strength. Drain, discard and replace nutrient every week or two to prevent nutrient imbalance.
- Maintain nutrient pH between 5.0 and 6.5. Adjustment may be necessary since water quality and pH vary both regionally and seasonally.

Bloom
