

COMMERCIAL GRADE MAINTENANCE

The ultimate solution for maintaining a clean irrigation system and hydroponic equipment.

TrueFlo™ Cleans and maintains hydroponic irrigation systems and equipment, and also combats scale, mineral and organic buildup.

TrueFlo™ is safe for plants* and all growing equipment. This versatile solution can be used to clean any component of your hydroponic system, including lines, emitters, reservoirs, trays, pumps and injectors/dosers.

**at recommended usage rates*

Note

Hypochlorous Acid (HOCl) is safe when applied to your fertigation system at the recommended dosage of 2 ppm or less. **If applied at over 2 ppm it will cause harm to your plants.**

Compatible with

Day Tanks

- 1 Add TrueFlo directly to day tank
- 2 Best practice is to use within 24 hours

OR

Injecting Stock Solutions

- 1 Do **NOT** add to stock tanks
- 2 Will require dedicated doser

APPLICATION GUIDE

With Plants

DIRECT INJECT

Dosage Range
3 - 9 mL/gal
Concentration Range
0.2 - 0.66 ppm

No Plants

LINE SHOCK (between grows - no plants)

Dosage Range
14 - 203 mL/gal
Concentration Range
1 - 15 ppm

No Plants

SURFACE CLEANER (between grows - no plants)

Dosage Range
200 - 280 mL/gal
Concentration Range
15 - 20 ppm
