Base Nutrients

Pro Performance Pack

FloraMicro® Pro
is used during a plant's growth and bloom cycles.

FloraGro® Pro
builds strong roots during a plant's vegetative stage.

FloraBloom® Pro
is for fruit and flower development.

CALiMAGic™ Pro
corrects calcium and magnesium deficiencies.

Floralicious® Plus Pro
enhances plant colors, vigor and aromatic qualities.

Liquid KoolBloom® Pro
increases fruiting and flower development.

Products available in one quart size, and 6, 55 and 275 gallon sizes. Visit generallyhydroponics.com for more details.

Aggressive feed is most suitable for:

- ≤1 irrigation event per day during peak production
- >#5 pot size, slow drybacks
- Low planting density
- Large, multi-topped cropping style

Medium feed is most suitable for:

- 1-5 irrigation events per day during peak production
- #2-5 pot size, intermediate drybacks
- Intermediate planting density
- Intermediate, topped/pinched cropping style

Light feed is most suitable for:

- >5 irrigation events per day during peak production
- 4", 6", #1 pot or block size, fast drybacks
- High planting density
- Small, untopped crops: sea of green style
