Flora Series®

Flora Series consists of three highly concentrated liquid nutrients: FloraGro builds strong roots during a plant's vegetative stage. FloraBloom is used during a plant's growth and bloom cycles. FloraBloom is added while a plant is fruiting and/or flowering. By using different combinations of these products, you can fulfill each plant's nutrient needs based on its growth stage and environment. Flora Series is a favorite among millions of growers worldwide. See why for yourself.
